Design of Printed Materials

Printed marketing materials have made up a significant part of my career as a graphic designer. Over the past two decades, I've designed nearly every type of physical promotional piece imaginable—from small postcards to full catalogs, and from single-page ads to complete magazines.

- brochures / flyers
- catalogs / sale sheets
- booklets
- presentation folders
- postcards / mailers
- magazines
- ads

Beyond Printed Pages

Packaging, Signage, Environmental & More

Yes, I've worked in designing way more than just flat pages; here's a partial list.

- ▶ billboards
- ▶ environmental signs
- ▶ office signage
- ▶ vehicle wraps
- ▶ trade show booths
- ▶ banners / flags
- ▶ table & counter wraps
- ▶ tents / pop-ups
- ▶ packaging design
- ▶ labels
- ▶ posters
- ▶ much more

PACKAGING DESIGN

Web Design & Social Media

I design clean, good-looking, SEO-friendly websites, and I'm happy to improve or build onto what you already have. Most of my recent work is in WordPress, so updating content is simple—whether you do it yourself or want me to handle it.

I also help with social media by creating eye-catching visuals, clear messaging, and easy-to-use Canva templates you can reuse anytime.

Illustration

Remember the carefree joy of drawing as a kid? I still feel that way—gray hairs and all. Grabbing pencils or brushes and getting lost in the process while the hours fly by is still a blast (espresso definitely helps).

Custom illustrations can really set your project apart, whether it's a watercolor painting, detailed line art, or a digital rendering. Give it a try.
